Number of devices with antivirus/antimalware updated as new definitions released.

Number of devices without antivirus/antimalware.

Number of devices where antivirus/antimalware status is unknown.

The next question relates to dataflows. For the definition of this question a dataflow can be viewed as either a DICOM send or a DICOM Query Retrieve. So for example if a capture device can send a study to a workstation and the same workstation is allowed to Query and Retrieve a study from the same capture device this would be counted as 1. Please complete table with number of data flows.

How many internal unencrypted dataflows

How many internal encrypted dataflows

How many external unencrypted dataflows
